

Control Statements – 2

1. What would be the output of the following code snippet if variable a=10?

```
if(a<=0)
{
    if(a==0)
    {
        System.out.println("1 ");
    }
    else
    {
        System.out.println("2 ");
    }
}
System.out.println("3 ");
```

- a) 1 2
- b) 2 3
- c) 1 3
- d) 3

d) 3

2. The while loop repeats a set of code while the condition is not met?

- a) True
- b) False

b) False

3. What is true about a break?

- a) Break stops the execution of entire program
- b) Break halts the execution and forces the control out of the loop
- c) Break forces the control out of the loop and starts the execution of next iteration
- d) Break halts the execution of the loop for certain time frame

b) Break halts the execution and forces the control out of the loop

4. What is true about do statement?

- a) do statement executes the code of a loop at least once

- b) do statement does not get execute if condition is not matched in the first iteration
- c) do statement checks the condition at the beginning of the loop
- d) do statement executes the code more than once always

a) do statement executes the code of a loop at least once

5. Which of the following is used with the switch statement?

- a) Continue
- b) Exit
- c) break
- d) do

c) break

6. What is the valid data type for variable “a” to print “Hello World”?

```
switch(a)
{
    System.out.println("Hello World");
}
```

- a) int and float
- b) byte and short
- c) char and long
- d) byte and char

b) byte and short

7. Which of the following is not a decision making statement?

- a) if
- b) if-else
- c) switch
- d) do-while

d) do-while

8. Which of the following is not a valid jump statement?

- a) break
- b) goto
- c) continue
- d) return

b) goto

9. From where break statement causes an exit?

- a) Only from innermost loop
- b) Terminates a program
- c) Only from innermost switch
- d) From innermost loops or switches

d) From innermost loops or switches

10. Which of the following is not a valid flow control statement?

- a) exit()
- b) break
- c) continue
- d) return

a) exit()
